Featured Products -

Dragon NaturallySpeaking Professional Edition

Dragon NaturallySpeaking 12 Professional enterprise speech recognition software lets users create documents and control their PC by voice — three times faster than typing — to drive productivity and cost savings. Create or modify documents, manage email, search the Web, or automate business processes. Even dictate into a digital voice recorder or compatible iOS device and Dragon will transcribe the audio files. Dragon Professional is the ideal solution for corporate professionals who want to work faster and smarter.

Dragon Speech Recognition software for Education -

Dragon speech recognition software is helping to enhance the educational process for students and teachers alike.

- Improve core reading and writing skills for students of all abilities, including those with physical or language-based learning disabilities, as well as English Language Learners.
- Dragon lets students dictate papers and assignments three times faster than typing — with up to 99% accuracy
- Teachers can rely on the software as a productivity tool to help them manage their overwhelming administrative workload

With all these advantages, it's no wonder that Dragon is being used in more and more elementary, secondary, and post-secondary school today—with great results.
